

WORLD PREMIER

POLYMOUNT FILM CLEANER

REUSE & RECYCLE YOUR PRINTED FILM

FILM CLEANER FACT SHEET

- The first machine that removes the ink from printed film and enables you to reuse your start-up film over and over again
- Able to clean different types of film
- Cleans all types of water based and solvent based inks
- Recycling without any ink
- Cleans up to 50 meters per minute
- ROI is a matter of months
- Robust and very compact machine that can fit in every printing facility
- Designed to clean 24/7
- Sustainable, while saving money on start-up film
- The machine is very user-friendly with low maintenance
- Full service maintenance contracts available

AVAILABLE IN TWO SIZES:

1300 MM WIDE & 1950 MM WIDE

Clean and reuse your printed film

ROI within months

The sustainable solution, which allows you to reuse your start-up film/waste

Reduces your film waste and thus improves your Carbon Footprint

Cleans water based and solvent based inks from all filmic substrates

Global maintenance & support

* Patent pending

REUSE & RECYCLE YOUR PRINTED FILM

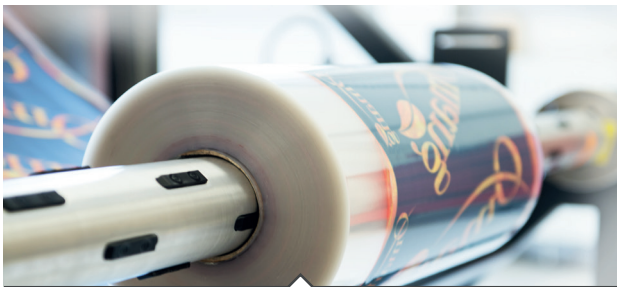

WWW.POLYMOUNT-INT.COM

GROUND-BREAKING & SIMPLE CONCEPT

It's simple; The Polymount Film Cleaner cleans your printed film and enables you to reuse this film for the next set-up of a new print job. Instead of ending up with thousands of meters of waste set-up film we have developed a machine, which allows you to reuse your set-up film over and over again.

Cleaning your set-up substrates is also beneficial even if you don't want to reuse it but choose to recycle it instead. Clean film with no ink remaining will obtain a higher resale value compared to printed film.

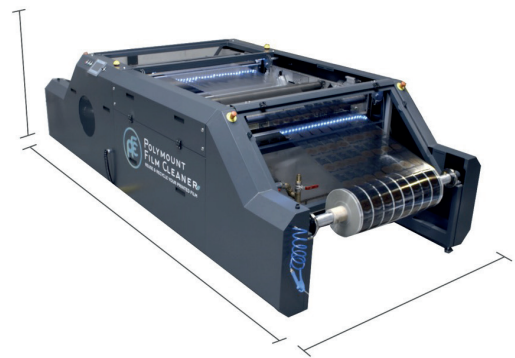

Polymount Film Cleaner cleans films up to:

1300 MM WIDE & 1950 MM WIDE

HOW DOES IT WORK?

Again, very simple; the roll of printed film is guided via multiple loops through a tank filled with a specially developed Polywash cleaning liquid. There is a recycle unit installed to keep the Polywash clean and maintain its de-inking ability. The last station is where the cleaned film is dried with patented technology, the end result is a roll of clean and dry film which is ready for the next set-up. The Polymount Film Cleaner can clean up to 50 meters of printed film a minute.

1300 MM WIDE FILM CLEANER

L 4700 MM X W 2100 MM X H 1300 MM

1950 MM WIDE FILM CLEANER

L 4700 MM X W 3600 MM X H 1300 MM

POLYMOUNT

CREATORS OF REUSABLE SOLUTIONS

Polymount International was founded in December 2002. The company philosophy is to create products that enable flexo printers to save money on their consumables, become more efficient and optimise print quality.

Polymount also manufactures two other products, one of which is the Twinlock self-adhesive sleeve. The other is an automated printing plate cleaner. Polymount is the global market leader with these products.

Polymount has several sales offices, manufacturing sites and exclusive distributors outside The Netherlands.
